Mankind consists of two kinds of people - normal people and Hellish people. However, those who really rule our human society are Hellish people and not the normal.

Hellish people have caused our human society to develop technically faster than ever before and one of the things that they have created in it is cinematography. Because they have always wanted to stay hidden from normal people, in all the serious resources of information they could not have said that they are out there and that they even rule the world. But they have started to use their secret signs in some of the movies that they have created. It usually deals with a so-called "Reminder of Hell", the examples of which you can find within this torrent.
